Matchmaking Conference Electromobility 2018

Field: Energy

Dates: 12-13 November 2018

Location: Berlin

Organizer: Federal Ministry of Economics and Energy (BMWi)

Electromobility is on the rise worldwide. It is a future core element of new sustainable mobility and an important chapter in the process of energy transition. The challenges for all affected industries are enormous: technical progress is rapid and involves extremely short innovation cycles. Traditional value chains are disruptively transformed. User acceptance must be improved - in favor of clean air in cities and villages. The effects of economic policies of crucial partner countries and new, serious international competitors, however, make structural change in the automotive industry even more difficult.

Discuss with other stakeholders the implications of these processes for the industrial location of Germany and cooperation with the EU as well as with international partners.

The "Networking Conference Electromobility 2018" offers German and international stakeholders from industry, research and politics a forum for networking, exchange of expertise and the initiation of cross-border cooperation. Top-class keynote speeches, podium discussions and expert forums as well as an exhibition of exhibits from research and development offer a context for comprehensive networking opportunities.

The "Electromobility Conference 2018" takes place at the hotel "andel's by Vienna House Berlin" Landsberger Allee 106, 10369 Berlin.

The event starts at 12:30

"EU Raw Materials Week" with H2020 Info Day & Brokerage Event

Field: Raw Materials

Dates: 12-16 November 2018

Location: Brussels, Belgium

Organizer: EU Commission

The event, hosted by the EU Commission, consists of a series of events, which include issues such as politics, technology, international cooperation and the framework conditions of the extractive industry.

A Horizon 2020 Info Day including Brokerage Event on the Horizon 2020 Raw Materials Calls will take place on 13 November.

The highlight of the week is the sixth High Level Conference on 14 November on "Raw Materials for Low Carbon and Circular Economy", which addresses key issues facing the extractive industry.

"Bioregions Forum" and "Biocities Forum"

Field: Bioeconomy and Urban Planning

Dates: 13 and 14 November 2018

Location: Barcelona, Spain

Organizer: European Commission

The "Bioregions Forum" is a one-day event that will take place on 13 November 2018 in Barcelona. The topic of this event is the "forest circular bioeconomy", aiming to create opportunities for the exchange of experiences between stakeholders from different bioeconomic regions.

Event: [here](http://www.ctfc.cat/bioregions/en/) (http://www.ctfc.cat/bioregions/en/) / Registration: [here](http://www.ctfc.cat/bioregions/en/registration.php) (http://www.ctfc.cat/bioregions/en/registration.php)

The "Biocities Forum" will take place on 14 November 2018. The event aims to promote international dialogue at the interface of science, politics and industry. The goal is to harness the potential of forestry and circular economy approaches to build sustainable, resilient cities. It will be about the following topics:
