

Conference of the "European Institute for Innovation through Health Data"

Field: Health

Dates: 19-20 November 2018

Location: Gothenburg, Sweden

Organizer: European Institute for Innovation through Health Data

On 19 and 20 November 2018, the annual conference of the European Institute for Innovation through Health Data will take place in Gothenburg. Here, experts from various research-oriented industrial companies, from European research institutes and universities as well as several patient associations will talk about and discuss the use of health data, its benefits, evaluation and risks as well as strategies and planning of clinical trials.

In lectures, workshops and a panel discussion, methods, results, tools, platforms, regulatory and privacy requirements, patient involvement and the quality of health data are discussed. Among the presentations are projects of the Innovative Medicines Initiative (IMI). The program offers many opportunities for discussion, networking and exchange with stakeholders from different sectors.
