

Conference and Pre-Conference Workshop "INDustrial TECHNOLOGIES 2018"

Fields: ICT/FET/Bioeconomy

Dates: 29-31 October 2018

Location: Vienna, Austria

Organizer: EU Commission

The conference "INDustrial TECHNOLOGIES - Innovative industries for smart growth" will give stakeholders from industry, academia and policy the opportunity to discuss the future of EU industry and EU research and innovation activities. It will combine keynote presentations, talks, a matchmaking event and exhibitions.

In the run-up to the conference, the workshop "How Will Biology Influence Future Technologies?", which focuses on the use of bio-principles and biological materials for technical applications, will take place. Participation in this event offers the opportunity to actively contribute in finding a topic for the upcoming framework programme "Horizon Europe". Registration for the workshop is possible until the 8 October.
