

Technology Talk "New Materials and Manufacturing Technologies for Lightweight Construction"

Field: New Materials and Manufacturing Technologies

Date: 8 November 2018

Location: Stuttgart

Organizer: Federal Ministry of Education and Research (BMBF)

The Federal Ministry of Education and Research (BMBF) invites to the technology discussion "New materials and manufacturing technologies for lightweight construction" in Stuttgart on 8 November 2018.

The aim of the technology discussion is to provide an overview of current challenges, research efforts and future trends in the field of lightweight construction. Keynote speeches provide an insight into innovative approaches and provide impulses for the subsequent discussion with experts from science and industry.

Participation in the event is free. Due to the direct proximity to Composites Europe, it is possible to link the event with a trade fair visit.
