

Research cooperations between universities and companies 19.06.2017, (Event Language is German)

The EU Framework Program for Research and Innovation HORIZON 2020 is the world's largest research funding program. 20% of the € 70 billion budget in HORIZON 2020 € is designated for SMEs. Companies in H2020 projects are essential for scientists to ensure the future transfer and sustainability of the project results. However, companies are still reluctant to attending a H2020 project. There is also a lack of contacts between SMEs and scientists to jointly implement common objectives such as internationalization.

The EU Hochschulnetzwerk in Saxony-Anhalt is able to provide answers and assistance how together with scientists companies can attend calls for proposals, initiate, and implement applications.

In the event, representatives from science and business will report on the experience they have gained during research cooperation. Furthermore, we will present the upcoming H2020 calls, give comprehensive information and answer questions.

The aim of the series of events is the active provision of information on tenders and the get-together of scientists and companies

Time: Tuesday, 30. May 2017; from 13:00 to 15:30

Place: Otto-von-Guericke-Universität Magdeburg, Campus am Universitätsplatz, Building 18, Room 501

registration by email to: f.wolf@ovgu.de
