
5.11.2019: Funding opportunities for cooperation between science and industry on 05.11.2019

On 5 November, the EU Academic Network Saxony-Anhalt will organize an information event on European, national and regional funding opportunities for cooperation between science and industry with a special focus on the needs of SMEs. The event will take place in Halle.

A key objective of Horizon 2020 in the EU Framework Program for Research and Innovation is to support the economic reuse of innovative ideas. A large number of the funding lines of "Horizon 2020" therefore address research collaborations between universities and research institutions and companies in particular.

The event aims to provide an overview of these funding opportunities in "Horizon 2020", with particular emphasis on the new SME support instrument for the "EIC Accelerator Pilot". In addition, funding programs for research cooperations of the federal government and the state of Saxony-Anhalt are presented.

A detailed program will follow shortly.
