

EU Sustainable Energy Week

Field: Energy

Dates: 17-21 June 2019

Location: Brussels, Belgium

Organizer: EU Commission

Since 2006, the two-month EUSEW has been moving policy-makers and citizens throughout Europe to promote activities for a safe, clean and efficient energy landscape.

The highlight of EUSEW is the conference in Brussels. To this end, actors are invited to organize sessions, to compete against each other in the context of awards and to meet in the so-called Networking Village.

In 2019, 60 sessions will provide a contribution to the topic of "Shaping Europe's Energy Future". If you want to participate actively, you can apply until 28 January 2019.

Further opportunities for active participation in EUSEW will be announced soon.

A call for the EUSEW Awards, which recognizes outstanding innovations in energy efficiency and renewable energy, will be published in December 2018.

In May and June 2019, local Energy Days will also take place across Europe.
