
Conference "Novel Antimicrobials AMR Diagnostics 2019"

Field: Medicine

Dates: 14-15 March 2019

Location: Berlin

Organizer: BIOCOM

The conference "Novel Antimicrobials AMR Diagnostics 2019" takes place in Berlin on 14-15 March 2019.

The conference serves as an information and networking forum for small and medium-sized enterprises (SMEs), start-ups, big pharma, academics, investors and public bodies in the field of antibiotic resistance research. During the conference, innovative ideas and strategies, as well as the specific challenges of SMEs for the development of antimicrobial agents and diagnostic procedures will be discussed.

Part of the conference will be a poster exhibition. It offers SMEs and scientific institutions the opportunity to present their innovative approaches to combating antimicrobial resistance to an international specialist audience.
