

BioCatPolymers Workshop

Field: Bio-Economy

Date: 15 May 2019

Location: Delft, Netherlands

Organizer: BioCatPolymers

The workshop "Efficient and Sustainable Production of High Added Value Bio-Chemicals via Biotechnological and Chemocatalytic Routes" organized by the BioCatPolymers Horizon 2020 project will take place on 15 May 2019 in Delft, The Netherlands. The workshop will offer scientists, industry and policy stakeholders the opportunity to discuss the benefits of bio-based high-value-added platform chemistry production.

The workshop program includes presentations by biochemical industry players and stakeholders in European projects working on innovative biocatalytic and chemocatalytic process concepts.
