

During the project period

The EU Commission is authorised to publish information on projects.

The **beneficiaries** are obliged to provide reports (**periodic** and **final reports**) in a form that can be published by the Commission at specified times. The reports also contain information on the expected **results** of the project and their social impact.

As the Commission publishes the reports in a way that is generally accessible, their contents should also be presented in a way that is comprehensible to a wider public.

A link to the project website must exist and it must be ensured that it is up to date. The link will be published on the Commission's website with general information on each funded project.

Beneficiaries should take measures to contact the public and representatives of the media. This should highlight the financial support provided by the EU.
